

Manual Exploratory Test Scenarios Document

Manual Exploratory Test Scenarios for Magento Demo Site

1. Homepage Navigation and Responsiveness

- Verify homepage loads correctly on desktop and mobile.
- Test navigation menus and dropdowns for responsiveness.
- Validate banner ads and promotional content visibility

2. Product Search and Filtering

- Search for popular terms (e.g., "Hoodie", "Track pants")
- Observe search suggestions and check for relevance
- Use filters (size, color) and verify correct results

3. Product Detail View

- Select different sizes and colors for products
- Check if images update to selected attributes
- Verify product descriptions and pricing

4. Add to Cart and Cart Updates

- Add products with different attributes to cart
- Change quantity and remove items from cart
- Verify mini-cart and full cart reflect updates accurately

5. Checkout Initiation

- Enter valid and invalid data in checkout forms
- Verify field validation messages for phone, email, etc.
- Observe if unexpected discounts or behaviors occur

6. Edge Cases and Exploratory Checks

- Input special characters and scripts in search and forms
- Test keyboard navigation and tab order on pages
- Validate behavior on slow or interrupted network connections
